

Results

Cell clusters

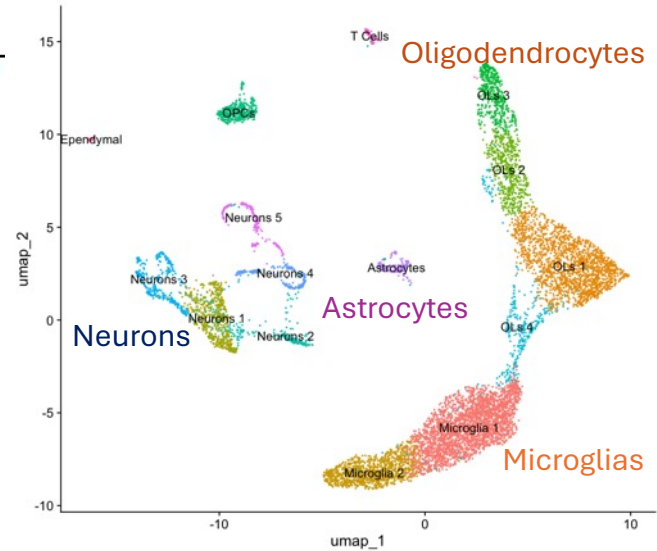

Samples from monkeys

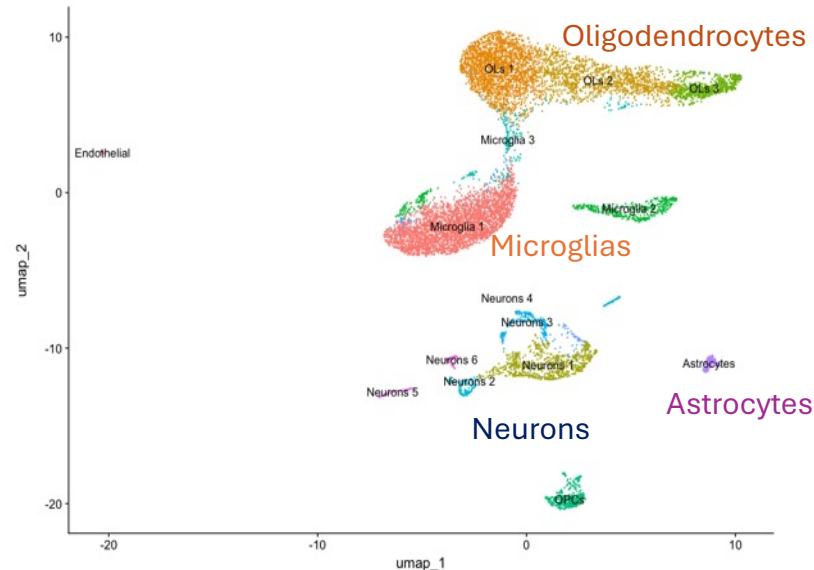

Spared Lumbar 0 dpi:
15 clusters

Spared Lumbar 7 dpi:
15 clusters

Spared Lumbar 30
dpi: 15 clusters

dpi: day post injury

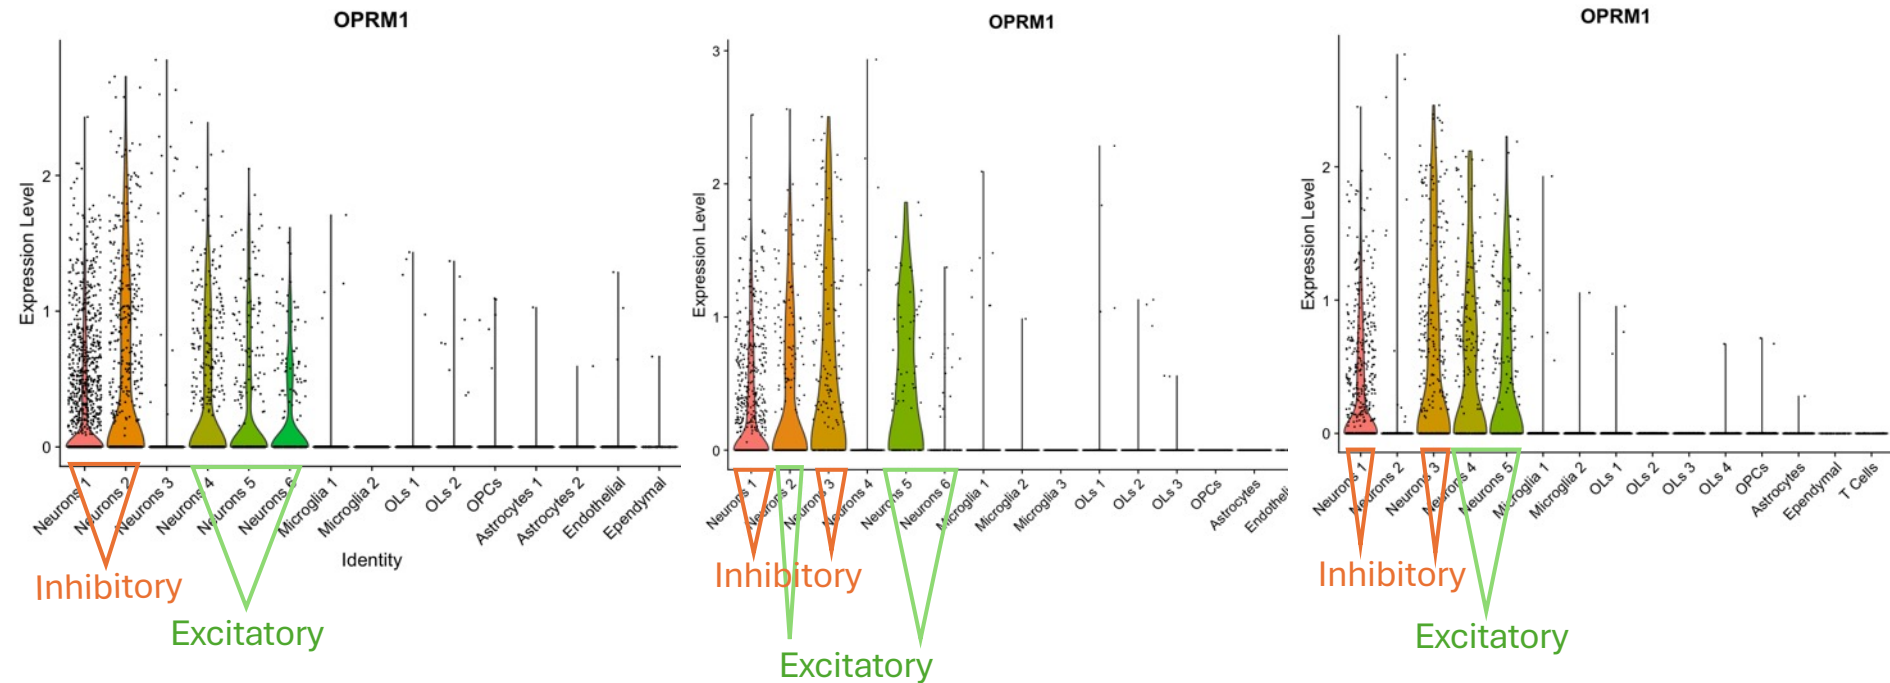

Results

Expression of OPRM1

Spared Lumbar 0 dpi

7 dpi

30 dpi

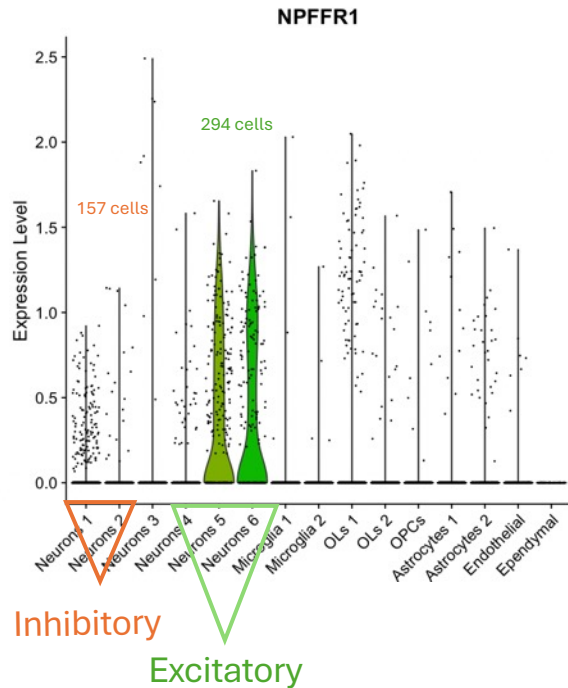

OPRM1 is mainly expressed in Neurons

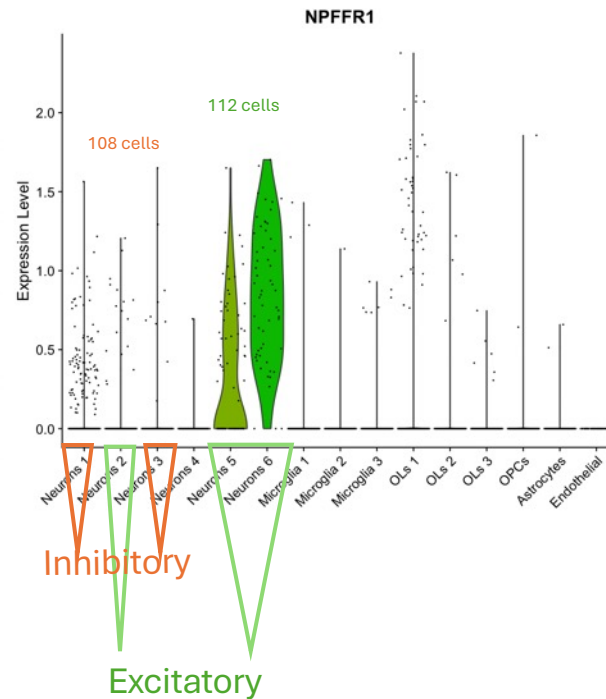

Results

Expression of NPFFR1

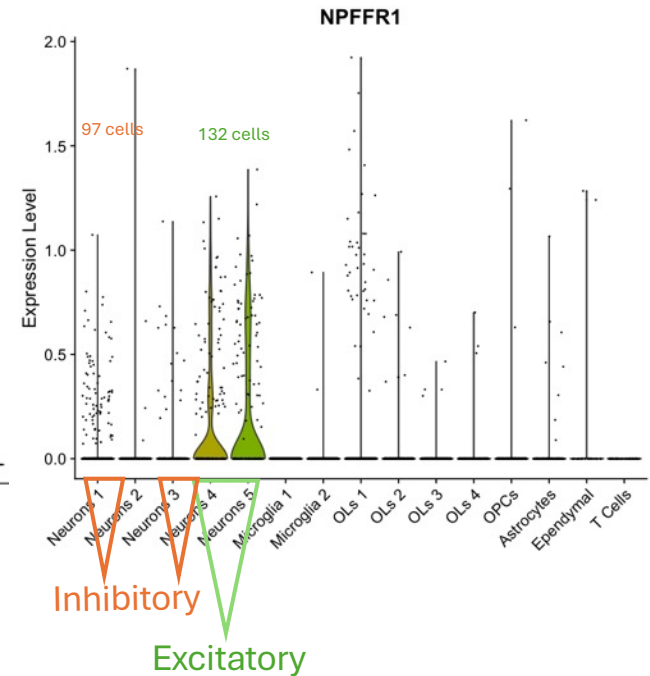

Spared Lumbar 0 dpi

7 dpi

30 dpi

NPFFR1 is mainly expressed in the excitatory neurons

Results

Expression of NPFFR2

Spared Lumbar 0 dpi

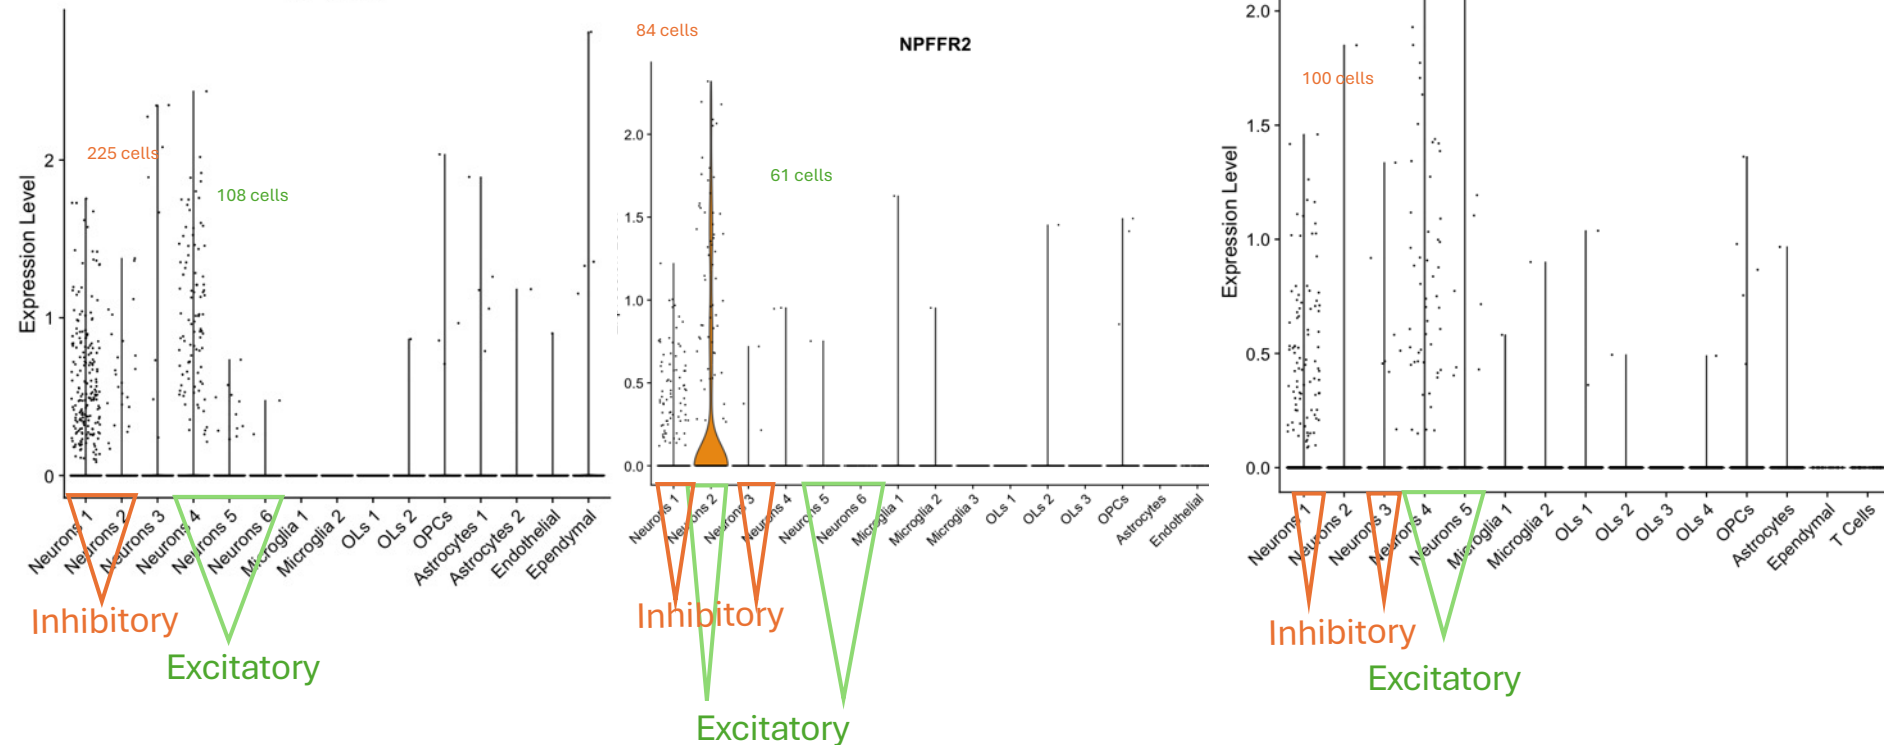

7 dpi

30 dpi

NPFFR2

NPFFR2

NPFFR2

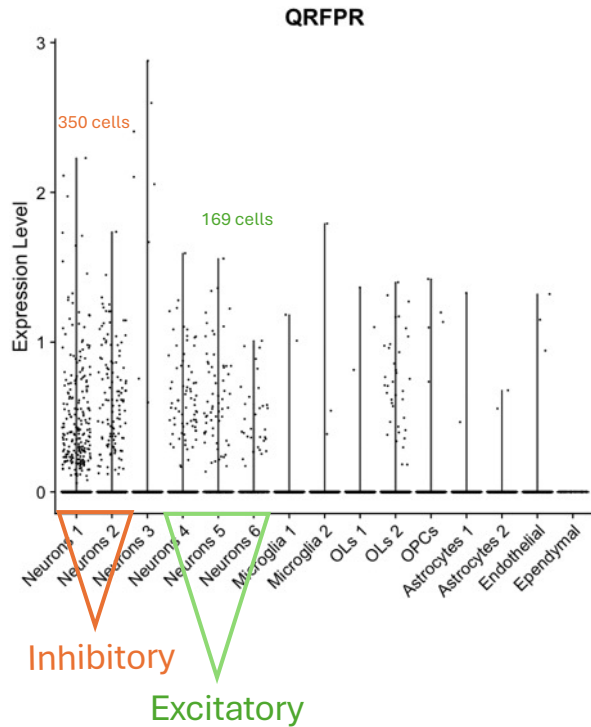

NPFFR2 is less expressed than NPFFR1 in spinal excitatory neurons
NPFFR2 expression is increased in excitatory cells 7 days after injury

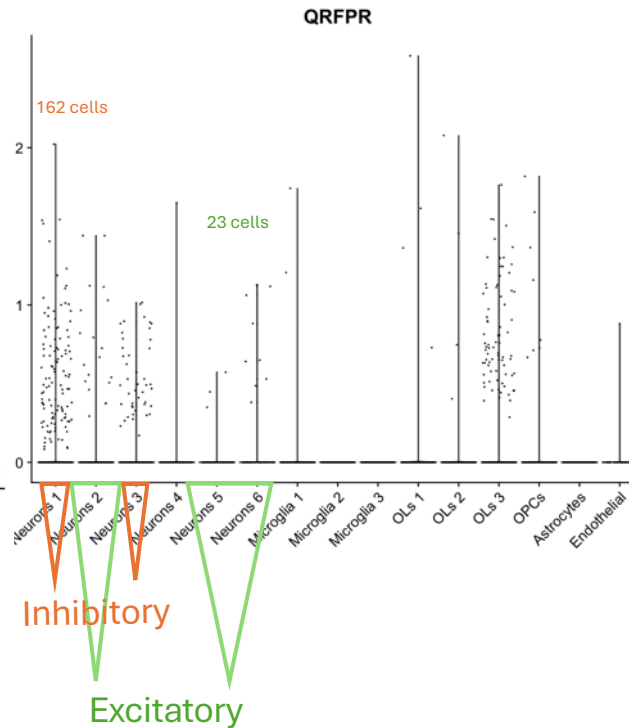

Results

Expression of QRFPR

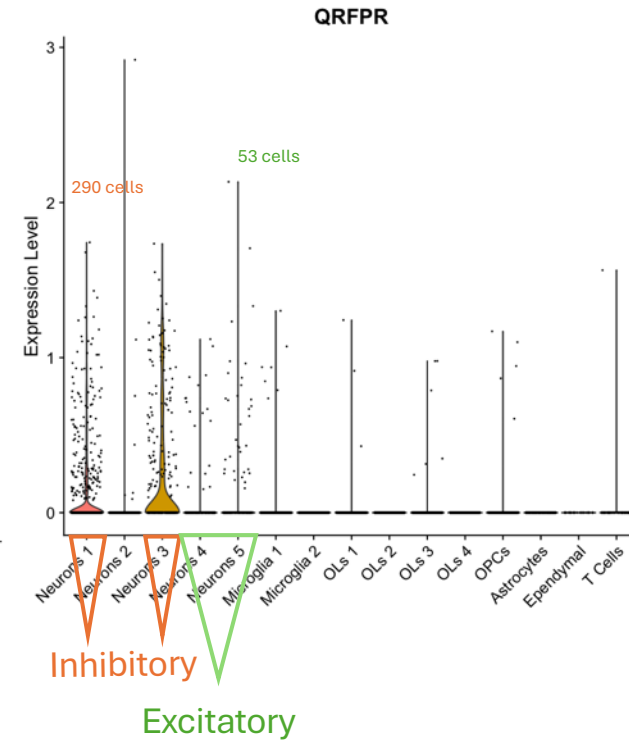

Spared Lumbar 0 dpi

7 dpi

30 dpi

Before injury QRFPR is expressed in inhibitory and excitatory neurons

The number of QRFPR-expressing cells increased in inhibitory neurons at 30 days

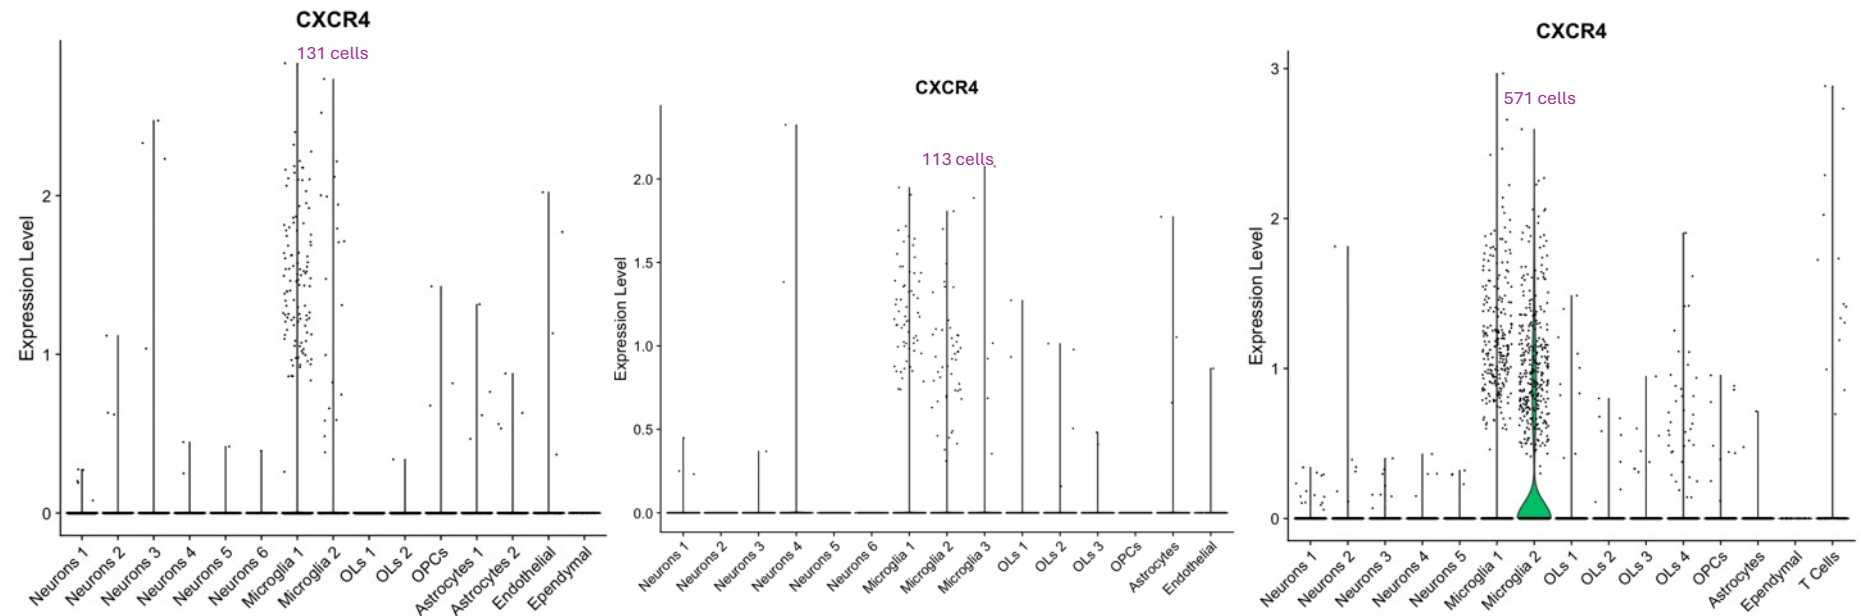

Results

Expression of the CXCL12 receptor CXCR4

Spared Lumbar 0 dpi

7 dpi

30 dpi

CXCR4 is expressed mostly in Microglia 1 before injury

CXCR4 is expressed in more microglia at 30 days after injury, and especially in Microglia 2

The summary of counts for cells in each clusters

Neurons: RBFOX3, MTUS2 (The main distribution clusters are Cluster 3, 9, 10 and 12)

Microglia: MS407, P2RY12 (The main distribution clusters are Cluster 0, 2 and 8)

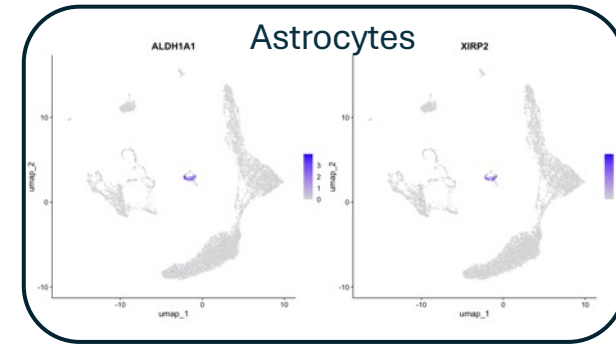

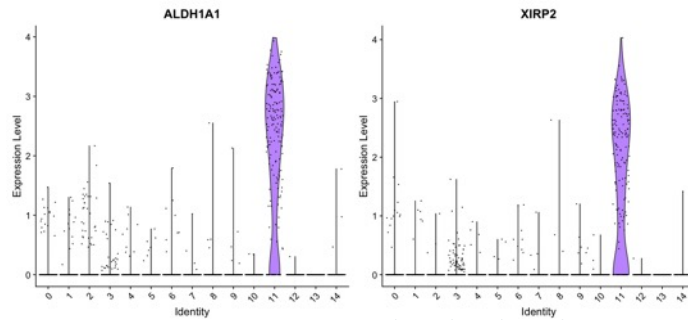

OLs : ANLN, ST18 (The main distribution clusters are Cluster 1, 4, 5 and 8)

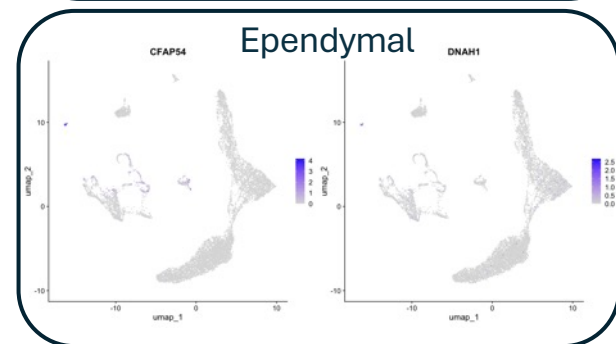

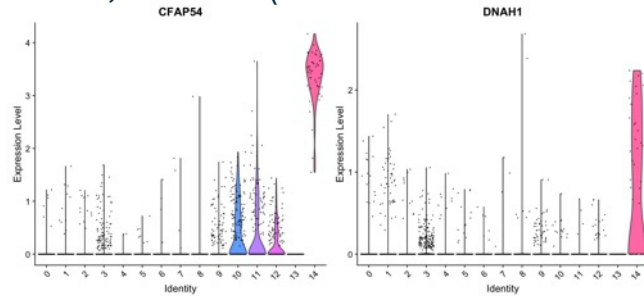

Spared Lumbar 30 dpi-Markers

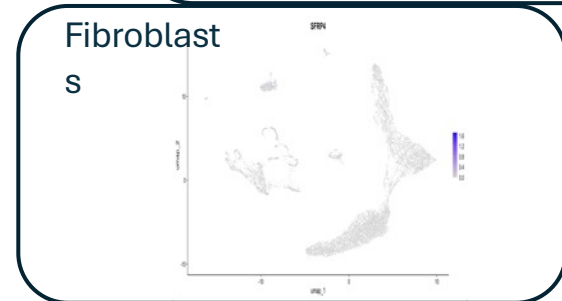

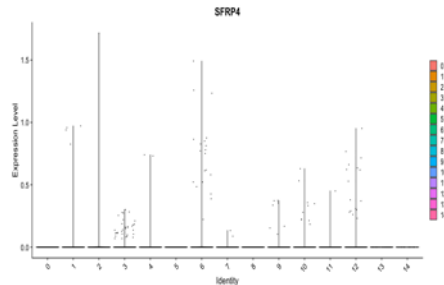

Astrocytes: ALDH1A1, XIRP2 (The main distribution clusters is Cluster 11)

Ependymal: : CFAP54, DNAH11 (The main distribution clusters is Cluster 14)

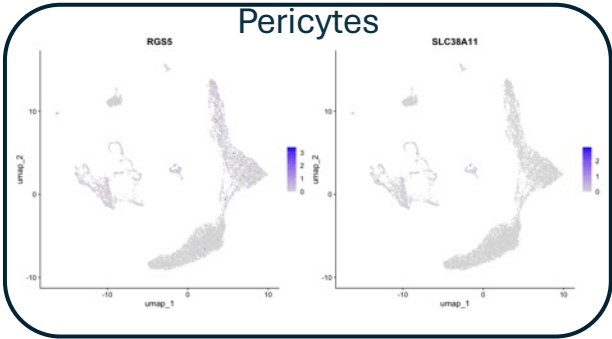

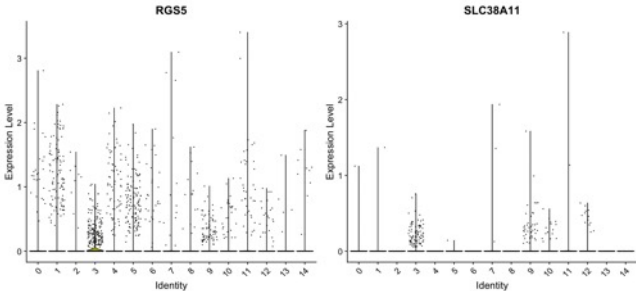

Fibroblasts: SFRP4

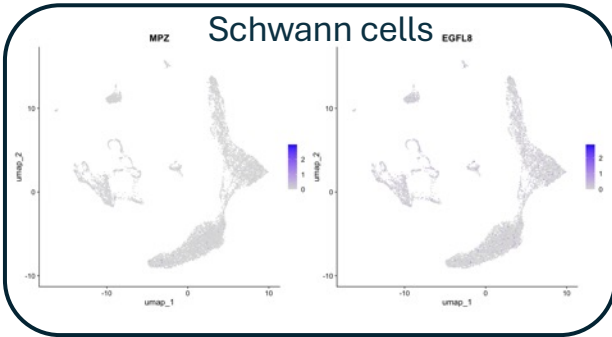

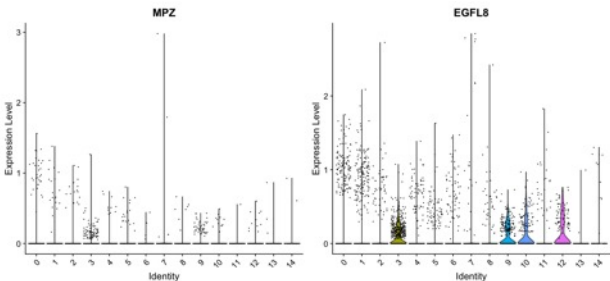

Spared Lumbar 30 dpi-Markers

Pericytes: RGS5, SLC38A11

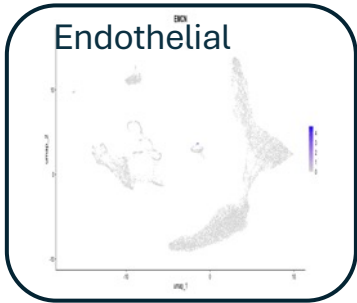

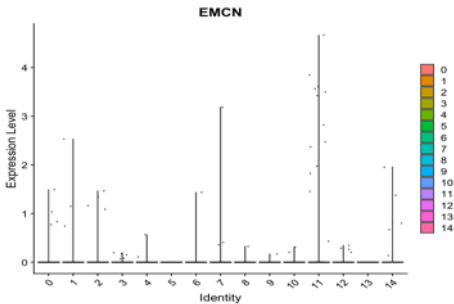

Schwann cells: MPZ, EGFL8

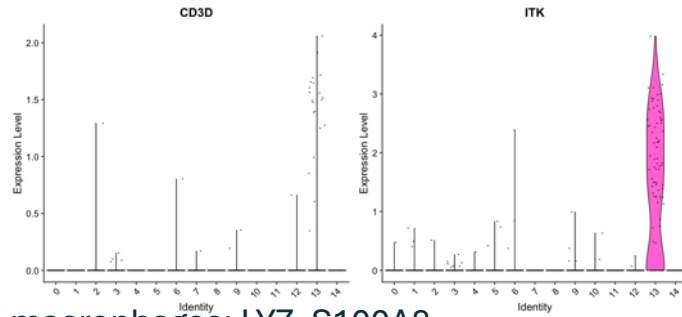

Endothelial: GLDN5, EMCN

GLDN5 not found

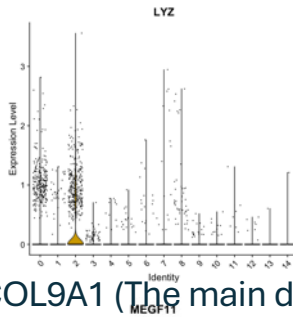

Spared Lumbar 30 dpi-Markers

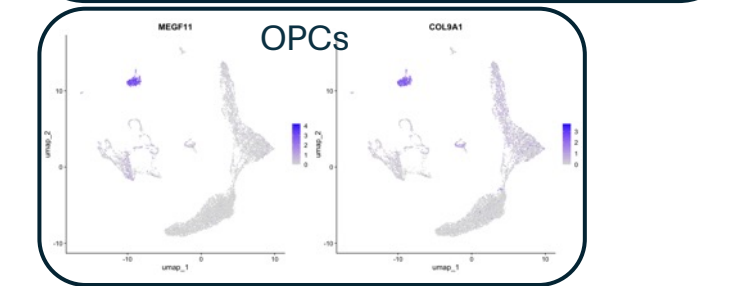

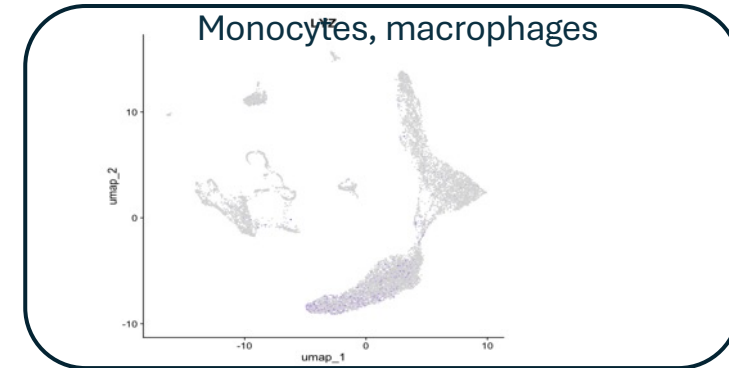

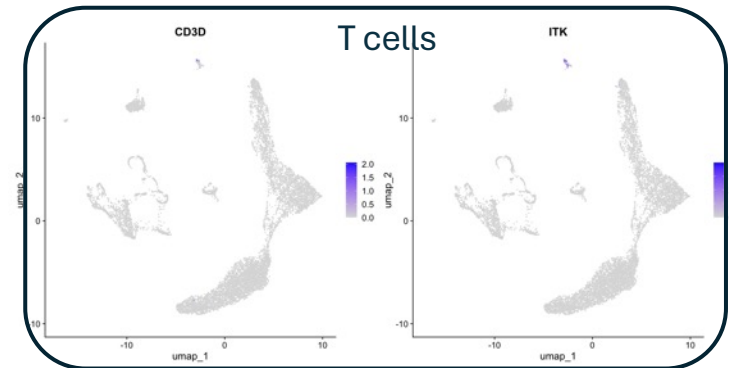

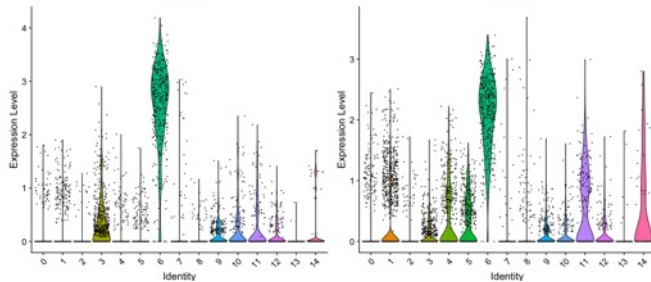

T cells: CD3D, ITK (The main distribution clusters is Cluster 13)

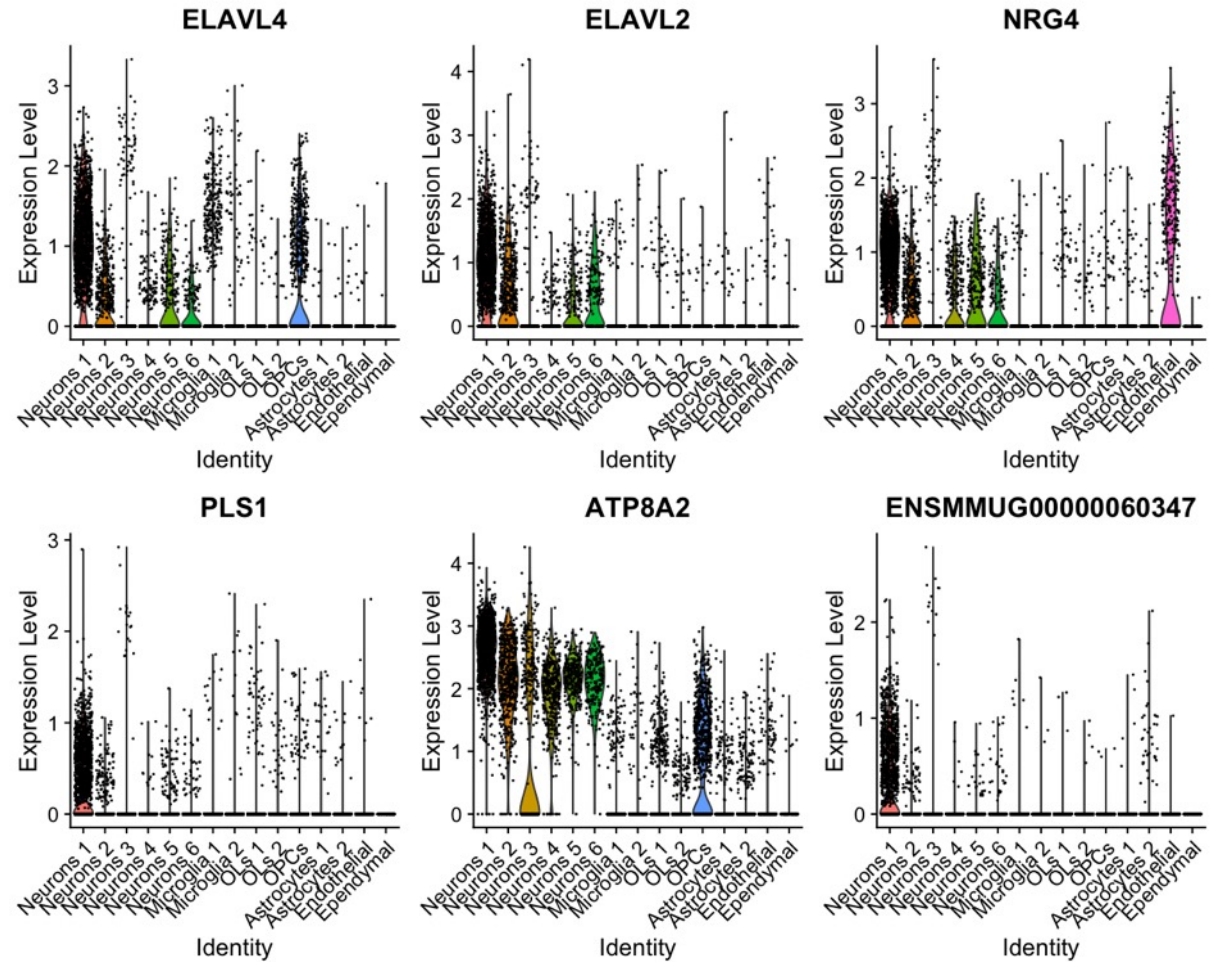

Monocytes, macrophages: LYZ, S100A8

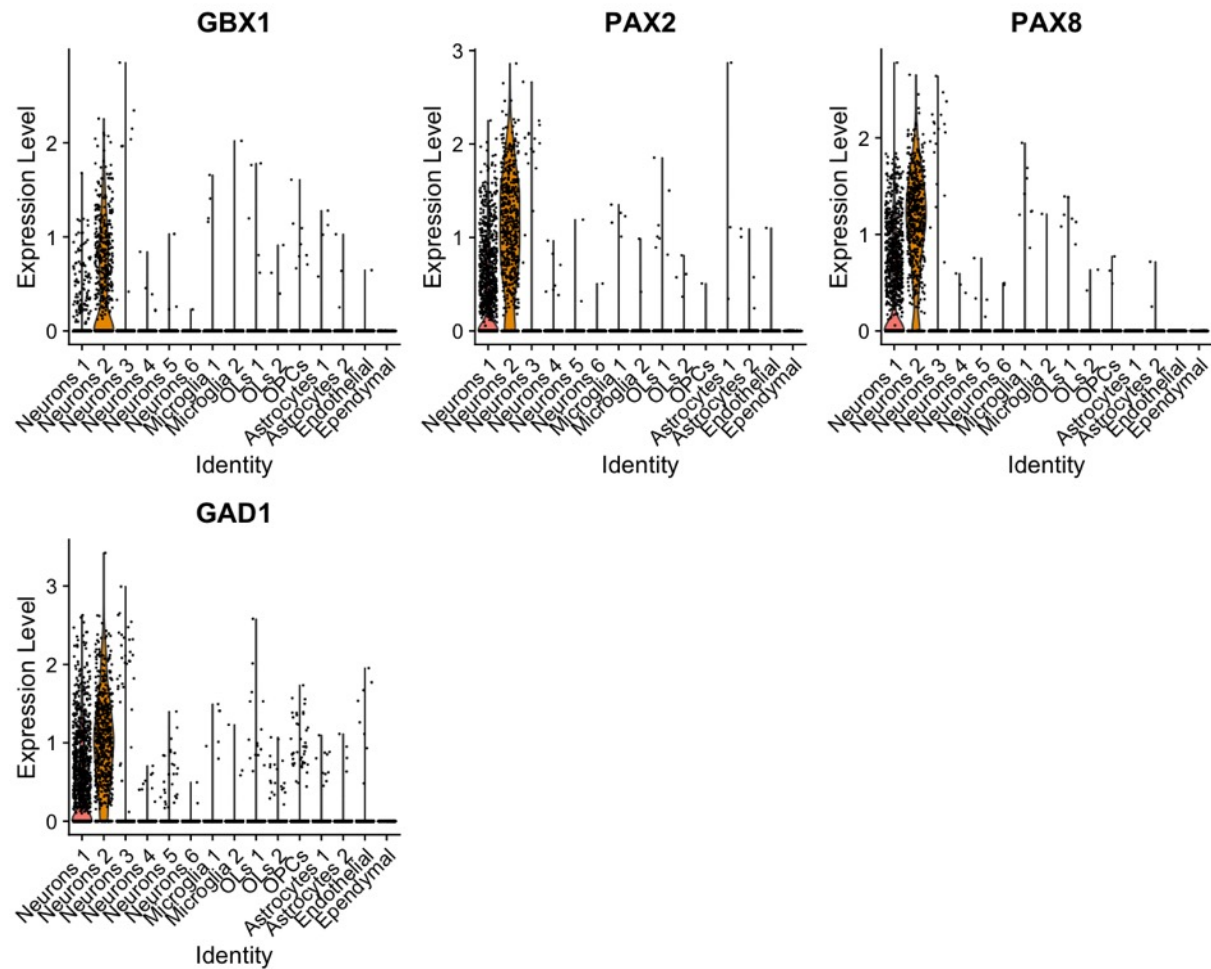

OPCs: MEGF11, COL9A1 (The main distribution clusters is Cluster 6)
